

SPECTRUM™

Your loved one is in good hands

Our comprehensive hand hygiene
program helps keep hands clean
and everyone healthy.

Why we take hand hygiene so seriously

We care very much about your loved ones and want to do all we can to protect them. Practicing good hand hygiene is the single most effective way to prevent the spread of infections¹—and it's so simple to do.

The Centers for Disease Control and Prevention (CDC) says the best way to kill the bad germs on our hands and keep us healthy is by cleaning them with an alcohol-based hand sanitizer when soap and water are not readily available.¹

Spectrum is always at your fingertips

That's why when you look all around our building, you'll see high-quality **Spectrum products**—from the lobby and patient/resident rooms to common areas and meeting rooms. A necessity in order to help keep everyone's hands clean and reduce the chance for infection.

Spectrum is made with only essential ingredients and moisturizers to deliver the cleanest and best-feeling hands.

Kills 99.99% of germs in as little as 15 seconds*

Clinically proven to moisturize skin

Safe for all ages

How we make hand hygiene second nature

We make cleaning hands easy. We've implemented a complete hand hygiene program to help your loved one and staff understand what to do, when to do it and how to do it. This encourages a healthier environment and helps us remain in compliance with the CDC and CMS guidelines.

Here's how we do it:

We place Spectrum products throughout our building so hand hygiene is always at your fingertips.

Our wall dispensers provide just the right amount of sanitizer or soap for ideal hand hygiene practice.

Easy-to-follow posters and signs encourage proper hand washing techniques and include reminders to clean hands often.

Spectrum is made with emollients—ingredients that make skin feel good such as aloe and vitamin E.

Our Spectrum of products clean hands in every way, every day

Spectrum's full array of sanitizers, ranging from 70–85% ethyl alcohol, fall within CDC recommendations and provide optimal opportunity for killing germs.

Best of all, our residents and patients love how their hands feel all day, encouraging them to clean their hands more often, reducing their risk for infection.

Check them all out:

Spectrum Advanced

Contains 70% ethyl alcohol; kills 99.99% of germs within 15 seconds*

Spectrum Clinical

Contains 85% ethyl alcohol; kills 99.9999% of germs on average within 15 seconds*. Dries fast and leave skin feeling great

Automatic and manual dispensers

Dispense just the right amount of Spectrum hand sanitizers and soaps
